FOR IMMEDIATE RELEASE

MOSAIC ADDRESSING MOVEMENT ON LOUISIANA FACILITY'S GYPSUM STACK

CONVENT, LOUISIANA, January 25, 2019 –Mosaic Fertilizer, LLC, today announced that it has initiated measures at its fertilizer manufacturing facility in St. James Parish, Louisiana, in connection with slow lateral movement of a side slope on the site's active phosphogypsum stack. No environmental impacts have occurred as a result of this geological event.

Mosaic has been transferring process water from the north cell of the facility's gypsum stack to other impoundments at the facility. Removal of this water is expected to reduce pressure on the stack slope. The company is pursuing additional technical solutions and providing regular updates to state and local officials.

The facility continues to operate and has redirected gypsum to alternative areas of the stack.

About The Mosaic Company

The Mosaic Company is one of the world's leading producers and marketers of concentrated phosphate and potash crop nutrients. Mosaic is a single-source provider of phosphate and potash fertilizers and feed ingredients for the global agriculture industry. More information on the company is available at www.mosaicco.com.
